Select from the following questions and share your thoughts with your colleagues:

Change leadership is the ability to influence and inspire action in others and respond with vision and agility during periods of growth, disruption, or uncertainty to bring about the needed change. - Can you describe some ways your leadership has **shifted to a more resilient design** since the pandemic, or some examples of resilient leadership you implement in your role?
- How do you **empower teachers** to be designers of learning environments and student engagement?
- How have you **shifted or plan to shift** from family outreach to family engagement?
- What are some ways you are **creating a culture of social emotional learning** in your setting? How do you, as a leader, model social emotional learning competencies in your setting?
